

Want to know what really happened in Copenhagen?

Did we seal the deal and what does this all mean for business?

Is the Copenhagen Accord strong enough? Will countries now commit by the end of the month to specific targets that can curb a global temperature rise to below 2 degrees Celsius and act in concert to ensure that a legally binding treaty is reached later in the year?

With a .09 degree increase in temperature across Australia over the last decade, we are well on our way to being one of the countries to be hardest hit by climate change in the world.

Do we want a land constantly ravaged by drought, fire, dust storms, flood, cyclones and storms? Or can we harness the opportunity and build a robust green economy?

Apart from the Government representatives in Copenhagen, there were over 25,000 members of civil society. There were over 1000 side events and exhibitions presenting the latest thought leadership in a raft of topics from curbing population growth to leading technologies and non financial reporting. Until there is a global binding agreement, this is what will lead our world.

To share in the thought leadership from Copenhagen and hear the views of those who were there, to learn what this means to you, your business and community, to discover the latest about non-financial reporting and to glean insight into how the global business community are tapping into the opportunities of climate change...

MOSS and the Institute of Sustainable Resources at QUT
invite you to join **MOSS** delegates to **COP 15** for a **Copenhagen briefing**

8.45am - 11.00am Friday 5th February, Lecture room GP B 506 – Building B QUT
(second building down from Parliament House), George Street, BRISBANE CBD

Speakers Include:

Professor David Hood. David Hood is a Chartered Professional Engineer, registered on NPER to practice in civil and environmental engineering. He has over thirty five years experience in business, engineering, education, project management, and senior executive positions in both the public and private sectors.

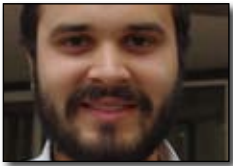

He is currently Chairman of his own consulting engineering practice specialising in the areas of sustainability in the built environment, "green projects", energy efficiency policy, engineering education and global engineering infrastructure. As a Board member and Chairman of Australia's College of Environmental Engineers (2008/09), David has been driving change to inculcate a sustainability culture

across education in engineering and the built environment disciplines. David is the inaugural Chairman of the Australian Green Infrastructure Council (AGIC).

David is actively involved with industry and professional associations promoting the improved energy performance of the built environment. He sits on a number of industry, community and university advisory boards where his extensive engineering background, and considerable involvement at a senior level in the built environment sector is influencing change in the "energy culture" of Australia. David is also an accredited presenter on Al Gore's Climate Project.

Sebastian Vanderzeil – Manager Carbon and Renewable Advice and Trading, Ecofund Qld. Sebastian is a Manager of Carbon & Renewable Energy Advice services at Ecofund Queensland. Sebastian previously worked with the Queensland Government Office of Climate Change and the Queensland Water Commission. He brings experience in economic modelling and environmental management to the renewable energy, carbon and sustainability sectors. Sebastian manages carbon and renewable energy advisory projects at Ecofund - including in the voluntary and compliance carbon markets in Australia, the Australian renewable energy market and internationally such as Greenhouse Friendly™ and the Clean Development Mechanism (CDM) and Joint Implementation (JI). He has a Bachelor of Natural Resource Economics (Hons. 1st) from the University of Queensland.

Phil Gibson – MD Bartercard and Director Carbon Trade Exchange. Phil Gibson's career with Bartercard commenced in 2000 with Bartercard Australia in Operations after a successful career in management in other sectors. Following a brief stint with Bartercard UK, Phil returned and became manager of the Customer Service and Administration Division before joining Bartercard International as the General Manager in 2007, becoming Managing Director in 2008. Phil is also a Director of the newly established Carbon Trade Exchange which is using the Bartercard platform to provide the world's first end to end electronic transaction for carbon credits.

Stewart Moore – EC3 Global Chief Executive Officer. Stewart Moore is the Chief Executive Officer of EC3 Global, the commercial and consulting arm of the Sustainable Tourism Cooperative Research Centre. Stewart has a Bachelor of Regional and Town Planning (Honours) from Queensland University, a Masters Degree in Regional Science specialising in Tourism Planning and Sustainability and a Post Graduate Diploma in Finance and Investment from the Securities Institute of Australia. Stewart has over 22 years experience in the tourism industry and has well recognised capabilities in the areas of policy development, tourism marketing, strategic planning and sustainability management. Stewart is a NIES accredited business consultant and one of the Asia Pacific's most experienced destination management and strategic planning consultants.

Anne-Maree Huxley – Founder and CEO MOSS. Anne-Maree is a key driver of Sustainability in Australia as founder and CEO of Models of Success & Sustainability (MOSS) the industry body for Corporate Responsibility and Sustainability. MOSS supports business through education, training, networking and advice to drive sustainability and competitive business success. She was one of the first 150 people trained by Al Gore around the world as a Climate Leader. She is also a Director of the Carbon Trade Exchange (which will provide the world's first end to end electronic processes for Carbon Credits), the One at a Time Foundation and is Chair of The Live n Learn Foundation. Anne-Maree is passionate about making a difference in the world. She speaks regularly about leadership, climate change and responsible business – and aims to assist business, government and community work collaboratively to address the complex issues of our time, with a vision and purpose that addresses sustainable development.

Tickets

MOSS Members \$66 Non Members \$88

Tickets include speaker notes, special event podcasts from Copenhagen along with a light morning tea and networking. Please note tickets are strictly limited and will be accepted on a first in best dressed basis – so book today to avoid disappointment.

How to get there and parking: The Lecture room GP B 506 – Building B QUT is the second building down from Parliament House, George Street and only 10 minutes walk from the city centre. Parking is available on Charlotte Street at **Wilson Parking** (Brisbane Central), or you may consider parking at **South Bank Parklands**, which is just a short stroll across the Goodwill Bridge. A map of the location can be downloaded at <http://www.gardenstheatre.qut.edu.au/parking/index.jsp>

Our special thanks to our hosts the Institute for Sustainable Resources QUT and to all our speakers. We look forward to sharing our knowledge and insights with you.
